**Thank you for purchasing this template.**

Here are some general points that you need to know to customize your project and get started.
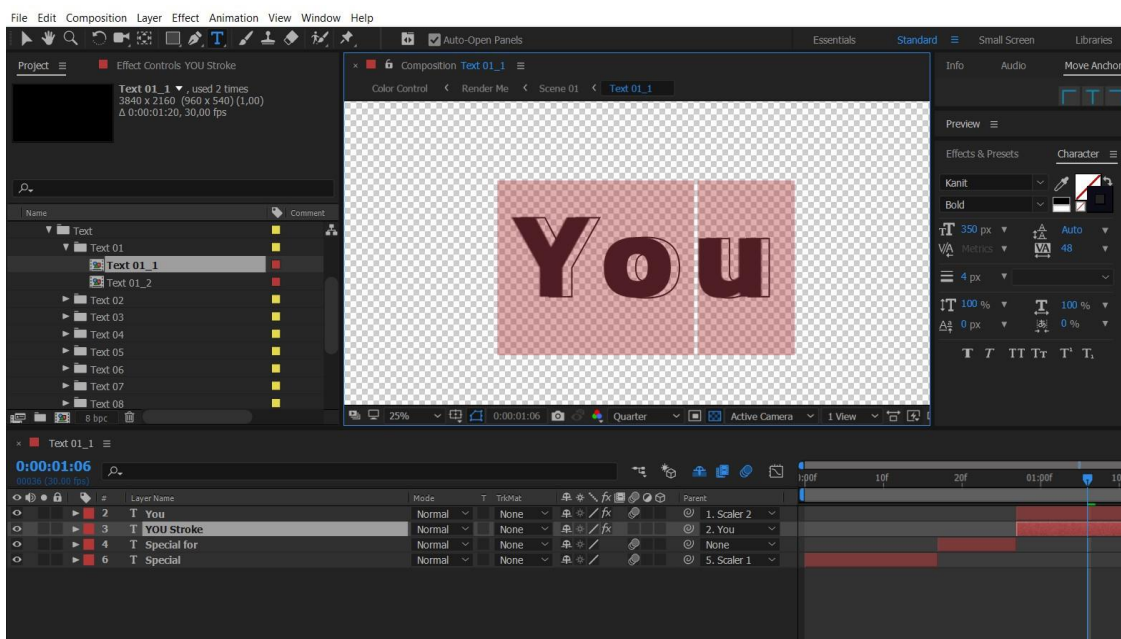

1. Add photo/video

Import your photos or videos. Open folder "01. Edit Comps" -> "Place", there you can find all media placeholders. Open one of them, for example, "Place 03". Drag and drop your media file on the layers panel.

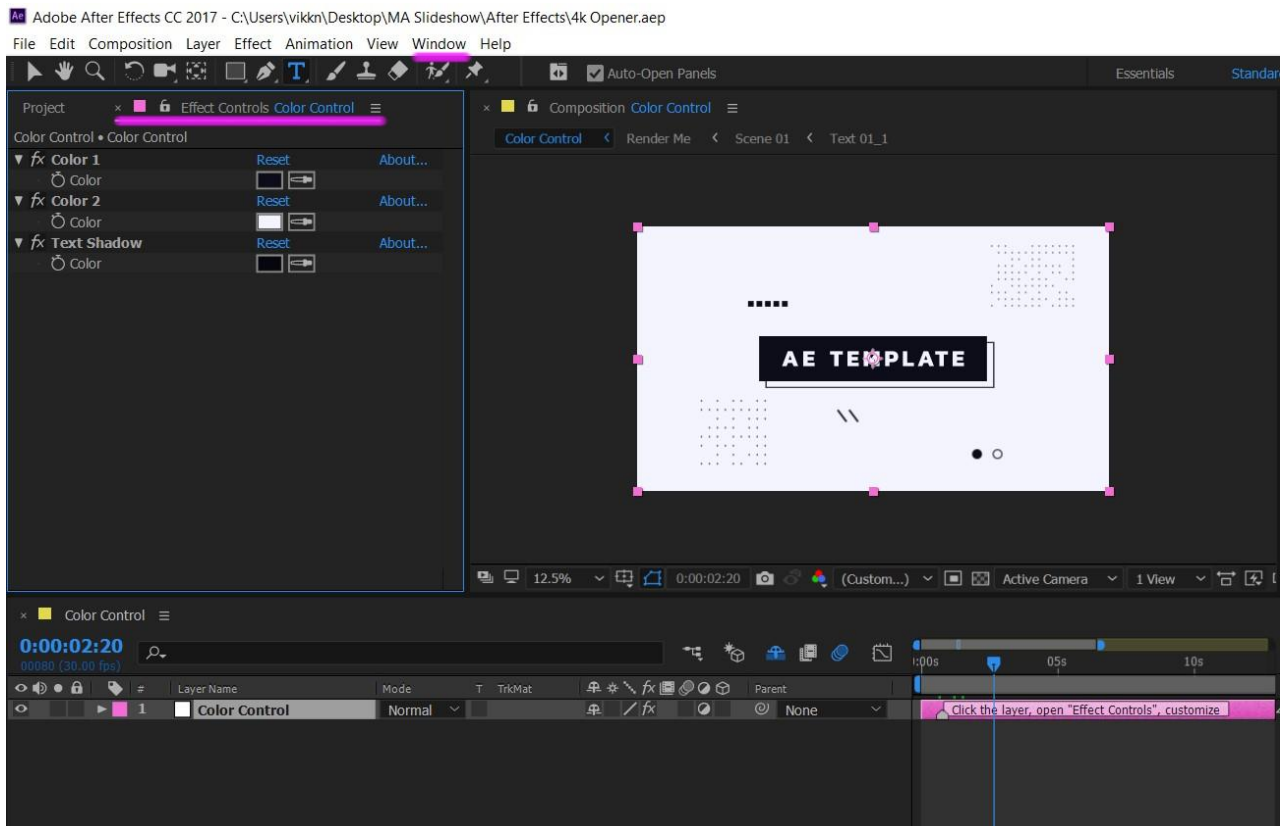

2. How to edit text

Open folder "01. Edit Comps" -> "Text" -> "Text 00". Open one of the compositions with text layers, for example, "Text 01_1", and edit the text. Each folder "Text 00" contains text compositions of each scene. Color of the text you can change at another comp "Color Control".

3. How to customize colors

Open folder "01. Edit Comps" -> "Color", there you will find color control composition. Open the composition, click the layer "Color Control", open 'Effect Controls', and change colors. "Effect Controls panel you can open: Window -> Effect Controls.

4. Music

Open "01. Edit Comps" -> "Music", and drag and drop music file on the layers panel.

5. Render

Open "02 Final Comps", open up "Render Me", then go to "Composition -> Add to Render Queue", set your settings and hit render.

The project has a modular structure. You can move every scene on the timeline as you need. If you want to add more scenes to the final project, double import the project and add more scenes to your final composition.
